Microsoft Excel

Microsoft Excel cannot access the file 'https://d.docs.live.net/1fb98583890cabd9/Adjutant Files/Post Reports and presentation/Minutes^J Minutes Dark/Fillable Reports/Membership Report.xlsm'. There are several possible reasons:

- The file name or path does not exist.
- The file is being used by another program.
- The workbook you are trying to save has the same name as a currently open workbook.

OK

## Info

### Post Reports Membership

Trusted Documents

Warning: Trusted Documents may open without any security prompts for macros, ActiveX controls and other types of active content in the document, and the document will no longer open in Protected View or Application Guard. For a Trusted Document, you may not be prompted the next time you open the document, even if new active content was added to the document or changes were made to existing active content. Therefore, you should only trust documents if you trust the source.

Exception: If an IT administrator blocks active content by setting a policy, or if you set a Trust Center setting blocking active content, the active content will remain blocked.

Allow documents on a network to be trusted  
 Disable Trusted Documents

Clear all Trusted Documents so that they are no longer trusted
