

# Introducing Microsoft Applied Skills

The new Microsoft-verified, scenario-based credential that proves proficiency in skill sets specific to critical business challenges.

Now available for ILT Deliveries!

# Microsoft Applied Skills: Targeted skill validation for real-world scenarios

Validates knowledge in skill sets specific to **critical business challenges**

Credentials earned by passing an **online, on-demand, product-specific assessment**

**Interactive lab experience** to demonstrate proficiency by completing real-world tasks

**Microsoft-verified credentials** offer a signal of trust to organizations, colleagues, hiring managers, and recruiters

# An emerging need for scenario-based credentials

For real-world problems and emerging technology

Identify talent  
for projects

## Technology leader | Talent Manager

Wants to attract and retain talent, gain better insight into the skill set of the workforce, and identify the right talent for specific projects like infrastructure modernization, security, or business resiliency.

Accelerate release  
of new projects  
or products

## Team leader | Project Manager

Looks for people with the skills to boost team's productivity and accelerate delivery for a new DevOps security project, which includes implementing pipeline security, designing an architecture with layered security, and monitoring for attacks.

Demonstrate  
product expertise

## Technology professional | Team member

Wants to deepen knowledge and demonstrate their ability to use innovative computer vision capabilities to help the organization build a solution using Microsoft Azure AI Vision.

# Choose the path that fits your career goals, desired skills, and experience

## Microsoft Certifications

Validates broad technical proficiency
