

THIS IS THE SERVICE THAT SHAREPOINT BUILT

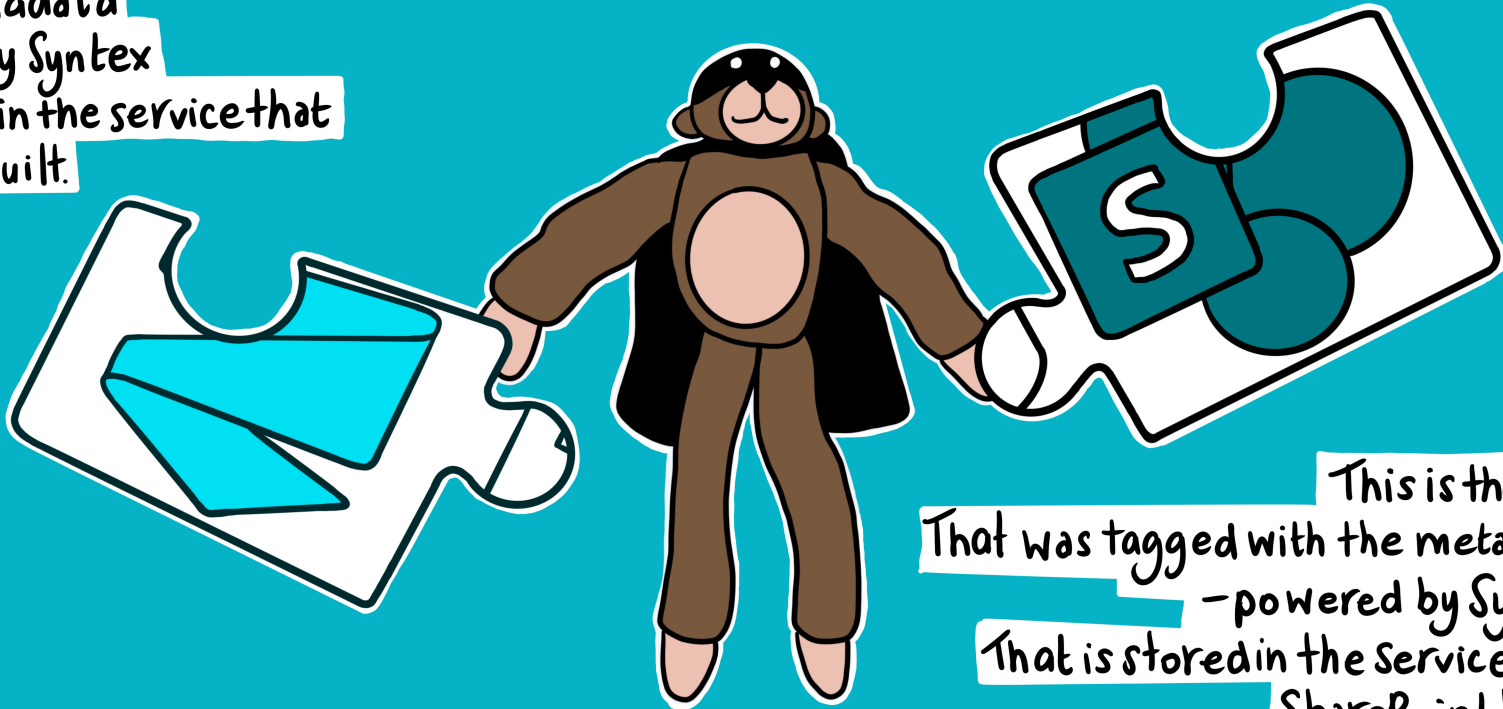

Written by Mark Kashman & Susan Hanley

Illustrated by Rebecca Jackson

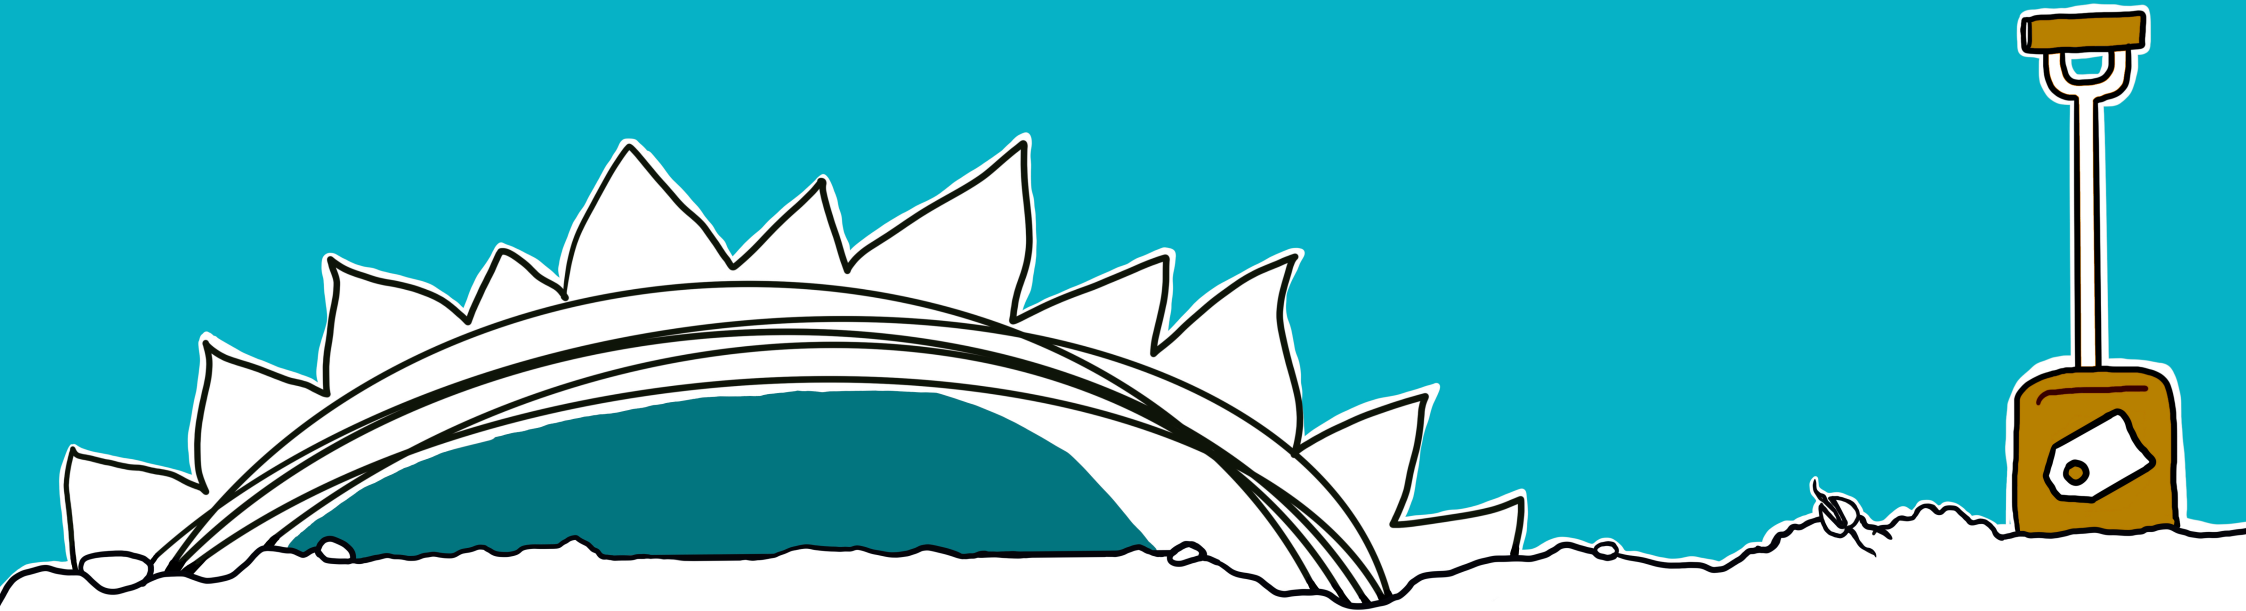

This is the service that
SharePoint built.

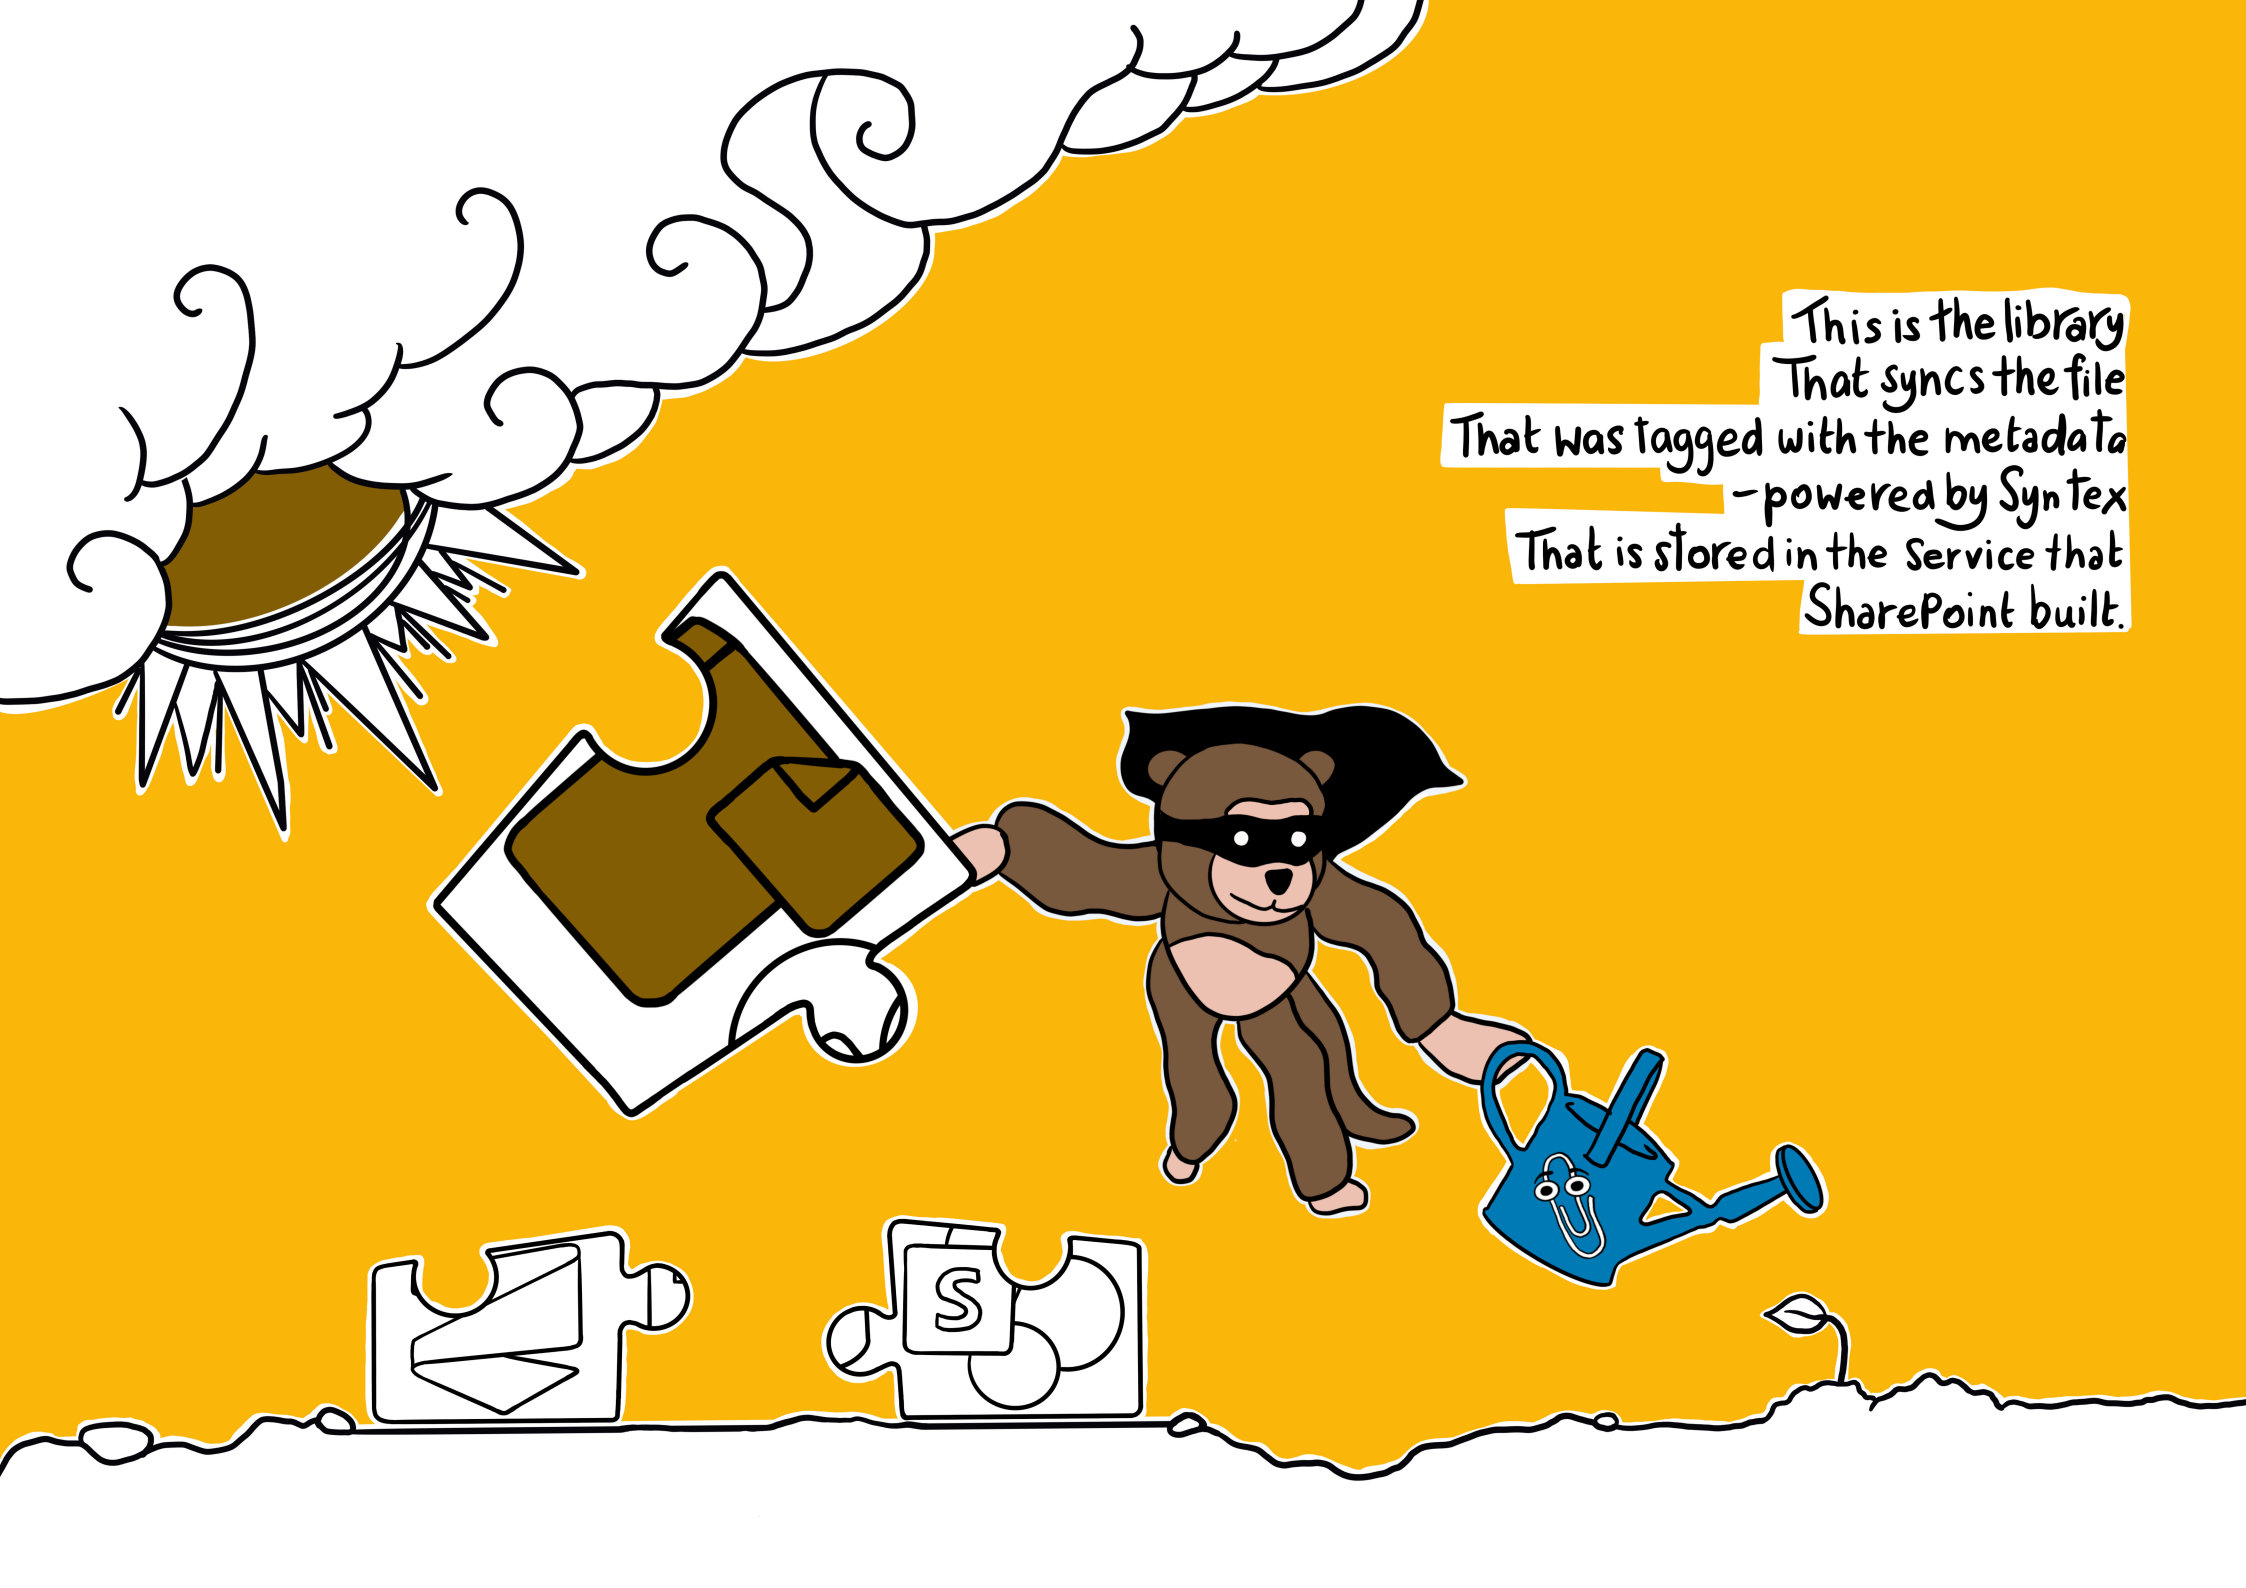

This is the metadata
- powered by Syntex
That is stored in the service that
SharePoint built.

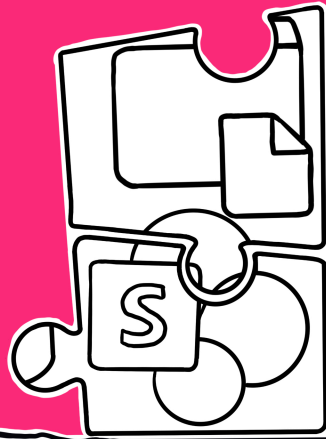

This is the file
That was tagged with the metadata
- powered by Syntex
That is stored in the service that
SharePoint built.

This is the library
That syncs the file
That was tagged with the metadata
- powered by SynTex
That is stored in the Service that
SharePoint built.

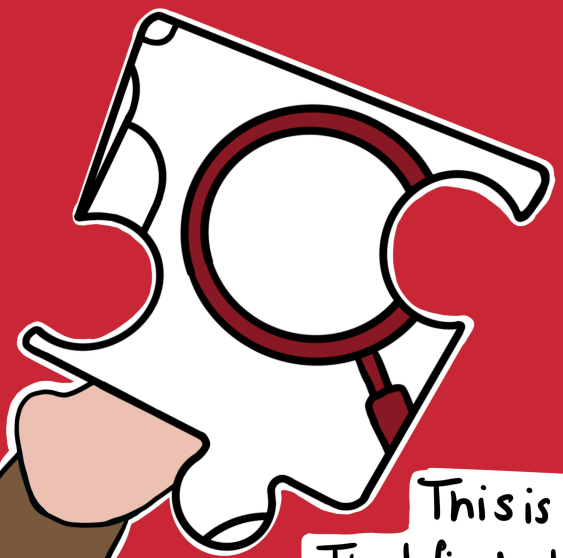

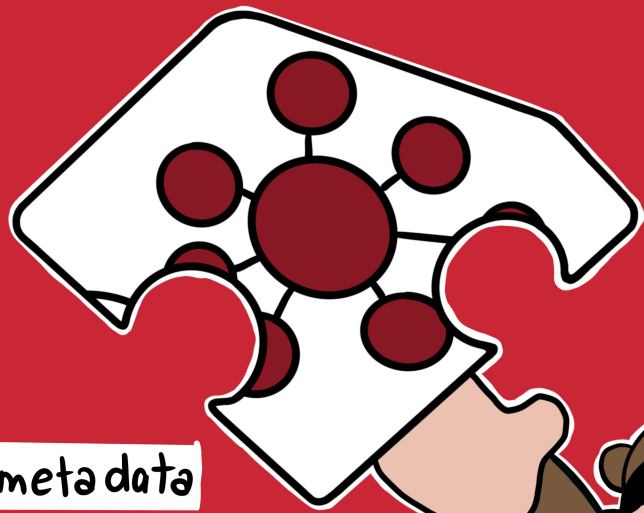

This is the site
That contains the library
That syncs the file
That was tagged with the metadata
- powered by Syntex
That is stored in the service that
SharePoint built.

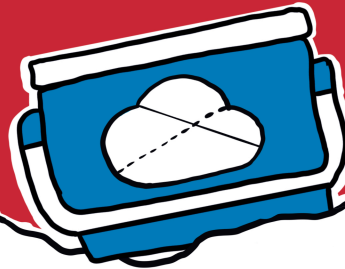

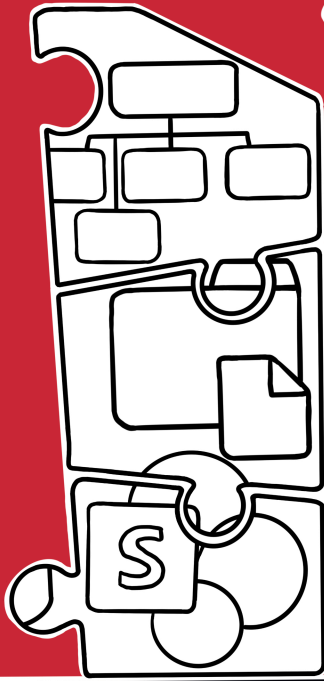

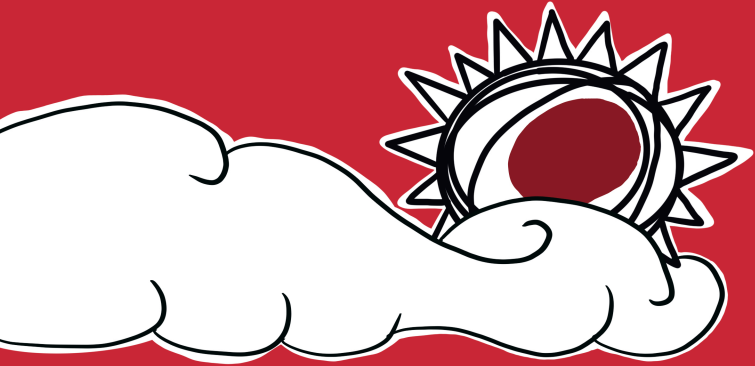

This is the hub
That associates the site
That contains the library

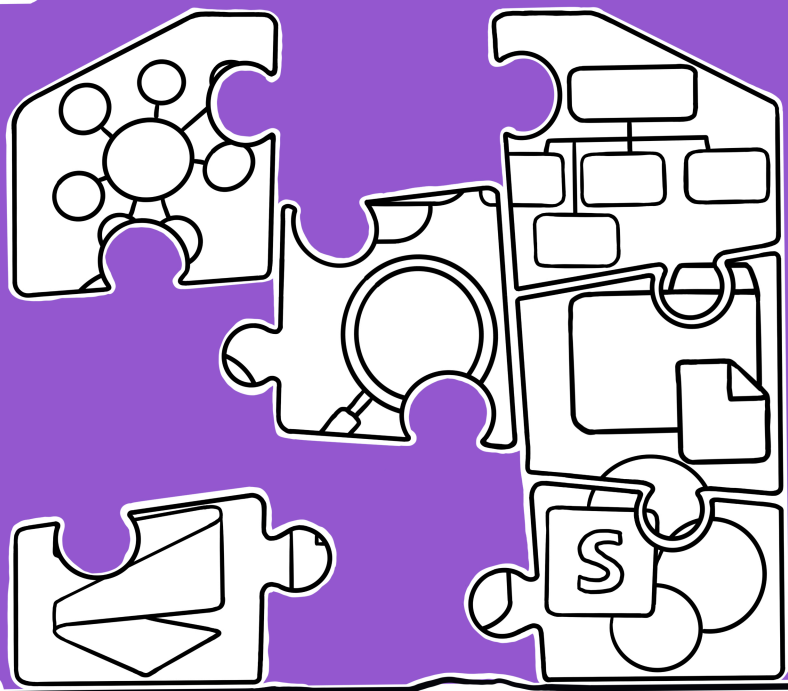

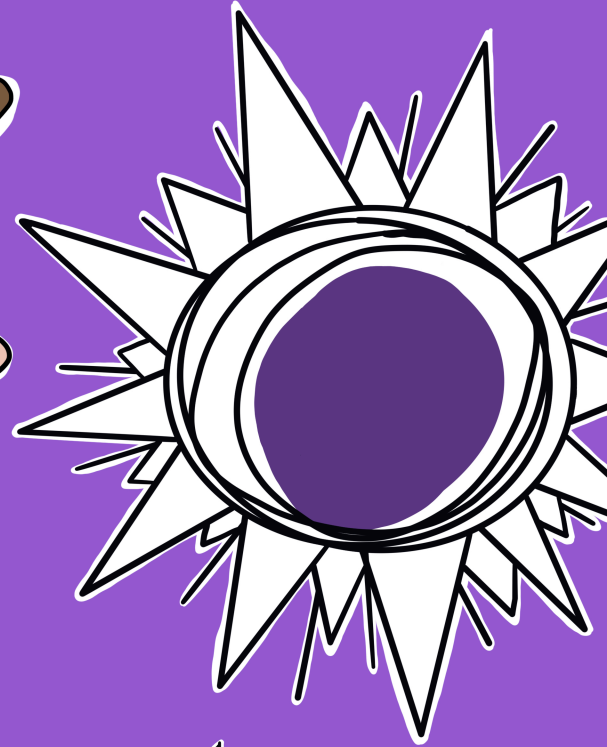

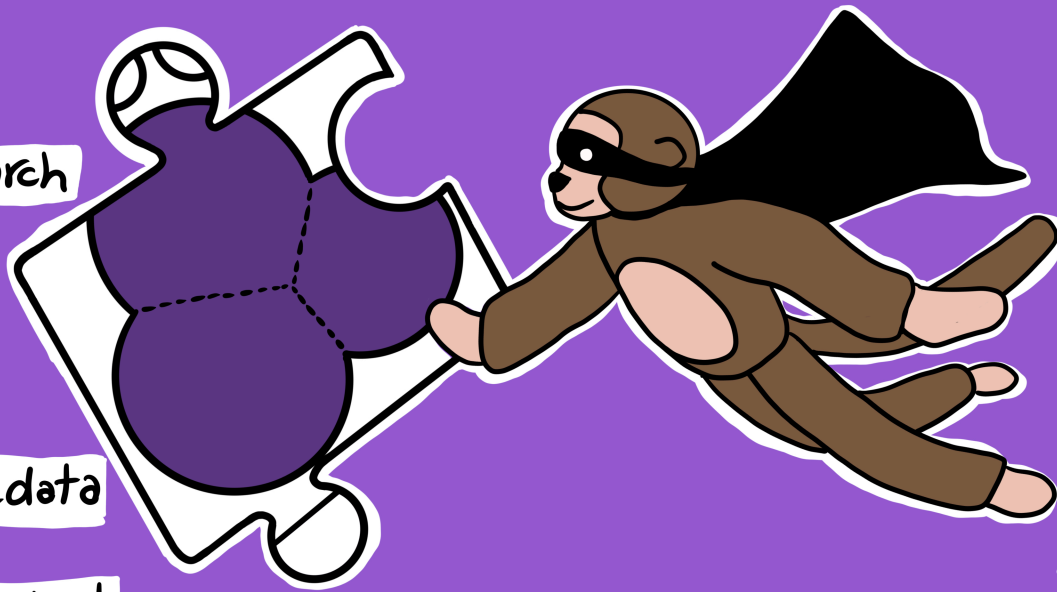

That syncs the file
That was tagged with the metadata
-powered by Syntex
That is stored in the service that
SharePoint built.

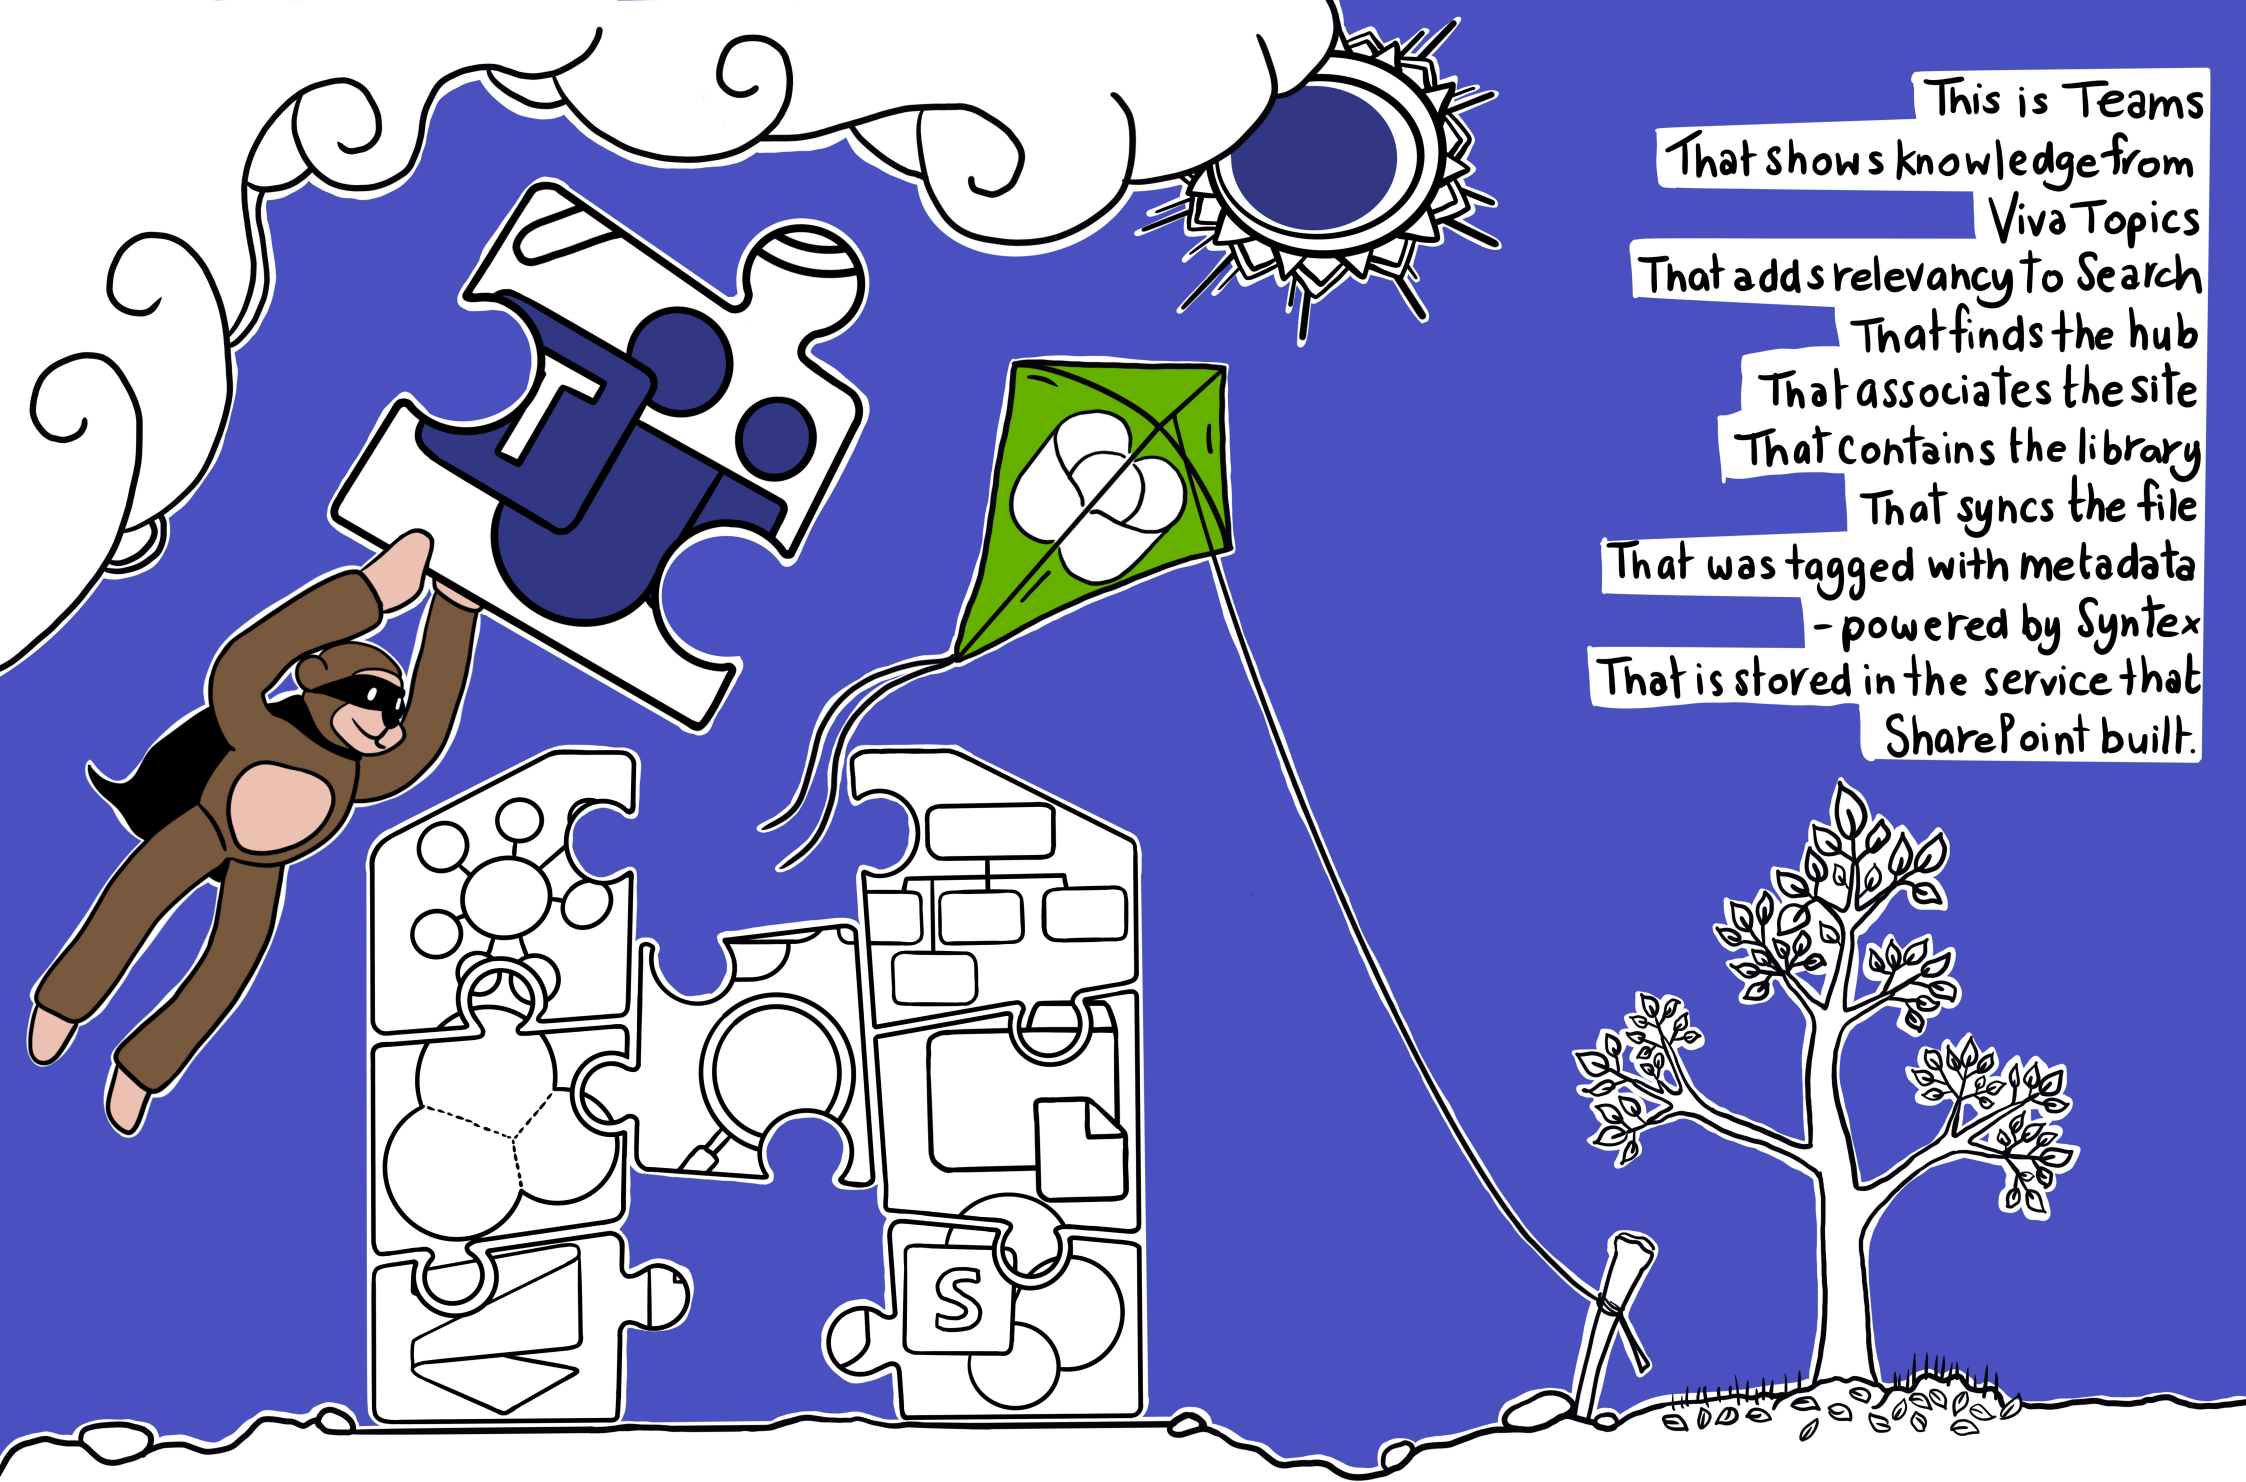

This is Search
That finds the hub
That associates the site
That contains the library
That syncs the file
That was tagged with metadata
- powered by Syntex
That is stored in the service that
SharePoint built.

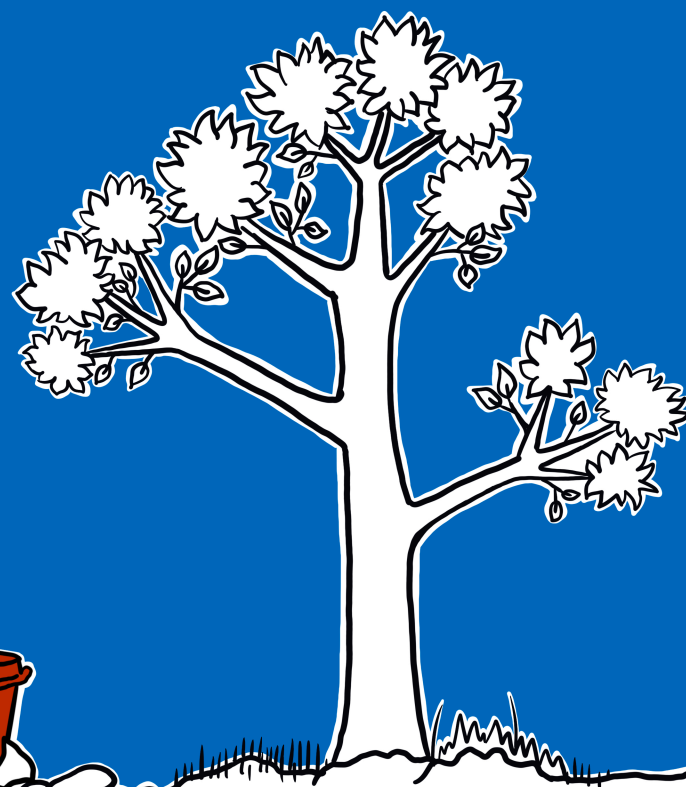

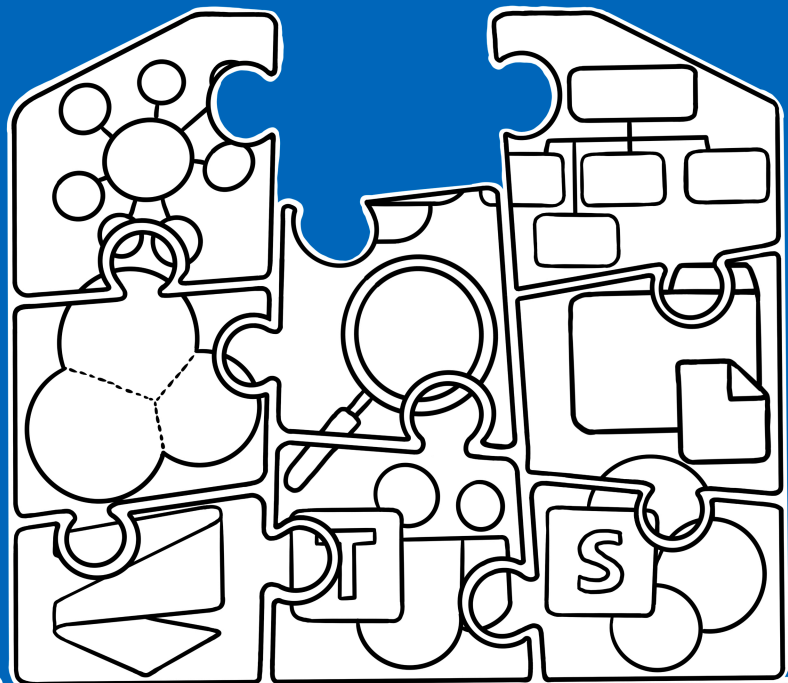

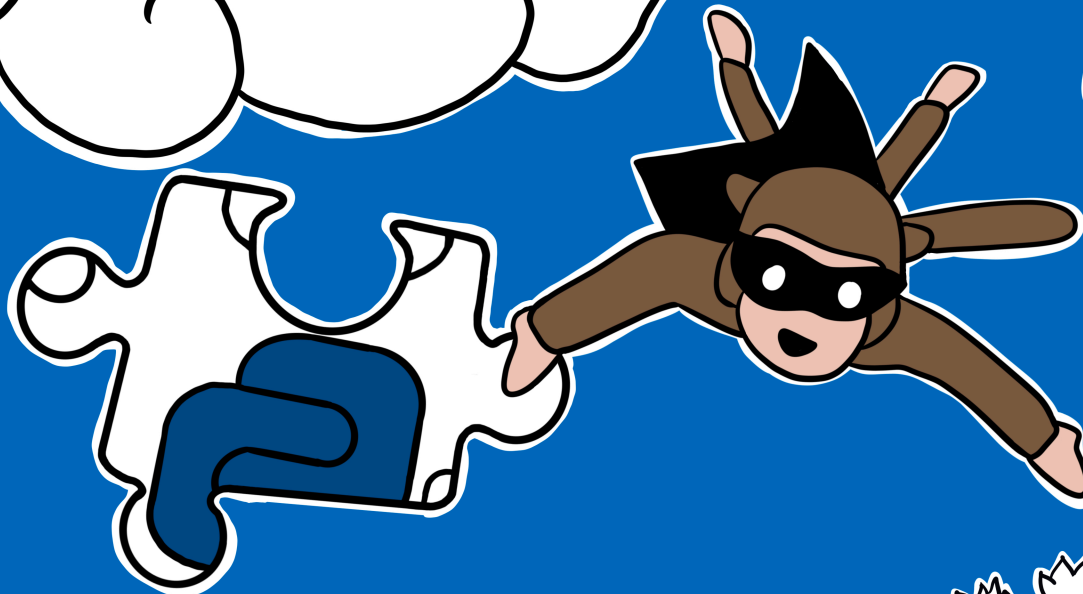

This is Viva Topics
That adds relevancy to Search
That finds the hub
That associates the site
That contains the library
That syncs the file
That was tagged with metadata
-powered by Syntex
That is stored in the service that
SharePoint built.

This is Teams
That shows knowledge from
Viva Topics
That adds relevancy to Search
That finds the hub
That associates the site
That contains the library
That syncs the file
That was tagged with metadata
- powered by Syntex
That is stored in the service that
SharePoint built.

This is Viva Connections
That brings your intranet to Teams
That shows knowledge from Viva Topics
That adds relevancy to Search
That finds the hub
That associates the site
That contains the library
That syncs the file
That was tagged with metadata
- powered by Syntex
That is stored in the service that
SharePoint built.

This is Microsoft 365

That combines apps and services in the cloud

That brings your intranet to Teams

With Viva Connections

That shows knowledge from Topics

That adds relevancy to Search

That finds the hub

That associates the site

That contains the library

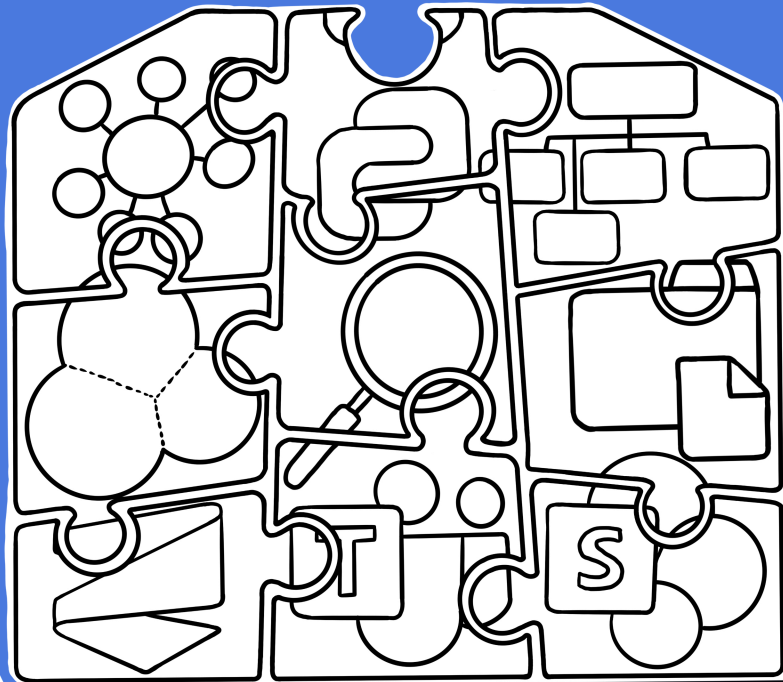

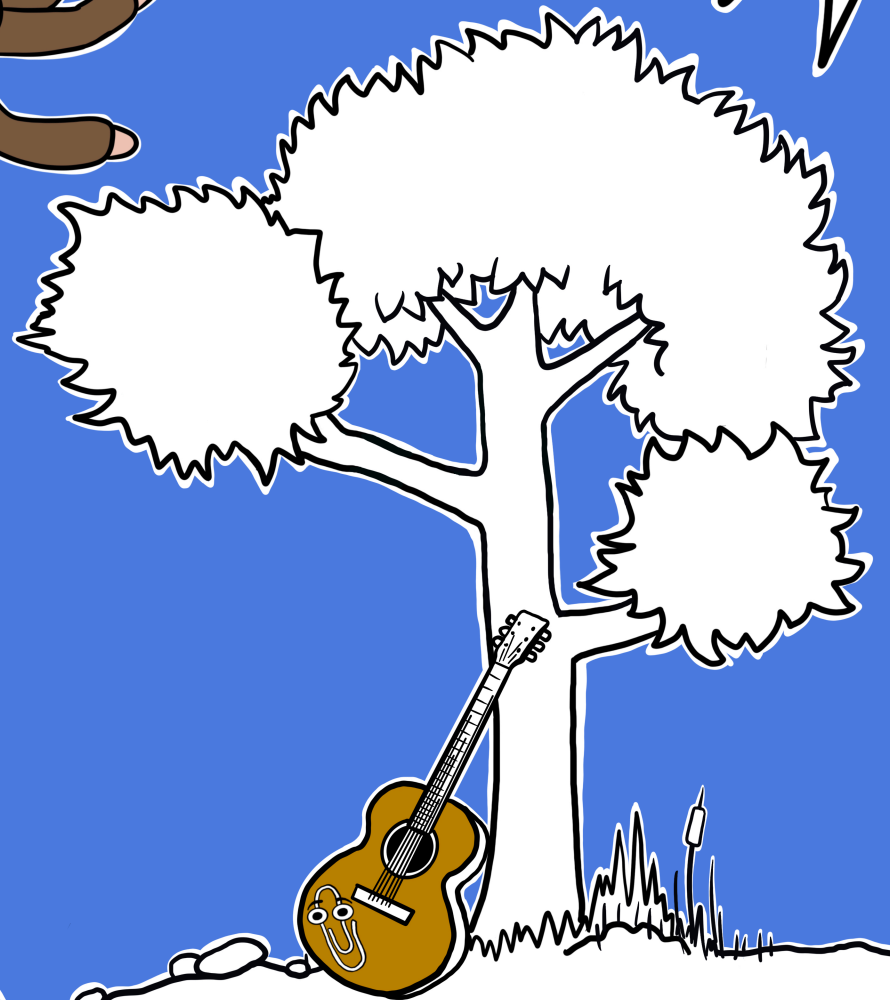

That syncs the file

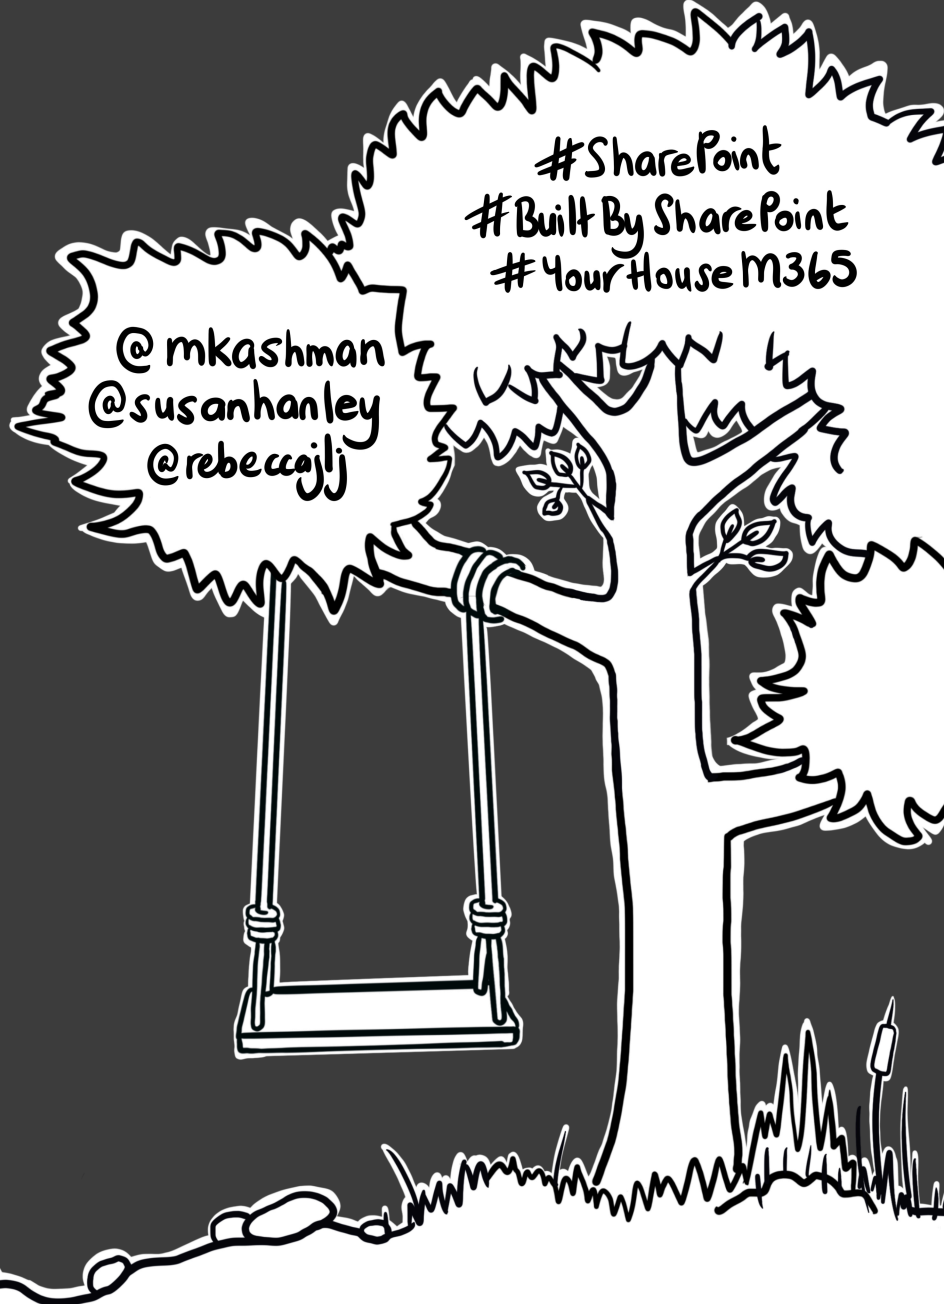

That was tagged with the metadata

- powered by Syntex

That is stored in the service that

SharePoint built.
